Imagine being able to look at the environmental disclosure of a company and gaining insight about the company’s strategy and pitfalls in the same sense that you would have gained when looking at the company’s financial statements. This is indeed possible.

In this three day programme, we will focus on the following:

• How to calculate a carbon footprint.
• How to analyse a carbon footprint and act on it.
• How to analyse other environmental footprints, like a water footprint.
• How to be ready for the legislated domestic disclosures.
• How to prepare for the gazette domestic carbon tax.

Some perspectives will be shared on the pitfalls of the carbon industry and how these can be avoided. Given that carbon footprinting is a new and evolving science, it requires an open and considered approach.

About the facilitator:

Dr Marco Lotz holds a bachelor’s degree in engineering (chemical), a master’s degree in the modelling of process systems with genetic programming (chemical engineering) and a PhD in engineering management and an MBA. Marco started his career in 2006 and consulted to a wide variety of industries, including steel and cement manufacturing and precious-metal mining and processing, where he was involved in numerous carbon reduction projects. He joined Nedbank in 2010 and was appointed as the Nedbank Group Sustainability Carbon Specialist.

This course is ideal for:

People calculating the carbon footprints in organisations that report to senior management. This course will greatly improve skills on how to do carbon footprinting. It is also ideal for the senior manager that needs to act on a calculated carbon footprint. This segment will be similar to a management accountant that does not compile financial statements, but should rather act on the results of the statements.

Apply:

Applications for short courses close strictly 10 working days before a course commences, accompanied by full payment of course fees. Please contact Mulweli Nethengwe at mulweli@sustainabilityinstitute.net for more information and to book your space.
