

## SUSTAINABILITY INSTITUTE

*The Sustainability Institute, founded in 1999 and situated within the Lynedoch Eco-Village, Western Cape, South Africa is an international living and learning centre for theory and practice in transformative learning towards just and flourishing futures.*

Our various activities and programmes strive to realise sustainability through learning, exploring, and applying ways of being that are restorative and generative. Our focus on transformative learning and social innovation is embedded through our research, teaching, and practice.

We also design and implement transformative learning experiences for adults that experiment with more just and generative ways of living, working, and being, thereby inspiring and equipping learners with the skills, knowledge, and mindset to activate change for sustainability within their own respective contexts. This is done through research, short courses and immersive learning experiences.

Our Trust work aims to have a transformative impact on the lives of children and youth in the Lynedoch Valley through the educational programmes we offer and by participating in a network of collaborative partnerships.

# RESEARCH AND ADVISORY SERVICES

Our range of research and advisory services aims to contribute towards sustainable transitions for regenerative futures. We want to assist, influence and capacitate individuals and organisations to activate change in their own context.

We have long-standing partnerships with a range of national and international Universities, Corporates, Development organisations and various Learning exchange organisations that makes use of our range of services below:

- Research
- Capacity building
- Project Management
- Course design and learning experiences
- Sustainability handbooks and guides
- Awareness campaigns
- Sustainability audits and more

## GROWING AN AFRICAN NETWORK

As an organisation we are interested in strengthening African thought-leadership on regenerative futures and just transitions. We would like to invite organisations with similar visions from all across the African continent to get in touch with us to see how we can collaborate towards African thought-leadership on creating regenerative futures for Africa from the ground up.
